Elephant POOPOOPAPER PARK

The Elephant Poop Paper Park is located in the Meilin area of Chiang Mai. It is an environmental protection park that processes elephant poop into paper. The elephant poop in the park is not only fertilizer, but also the raw material for making craft paper. In this park, you can not only buy paper made from elephant poop, but also visit the production process of poop paper, and you can also participate in the production yourself.

travel

Elephants are a symbol of Thai culture, a symbol of auspiciousness and a messenger of the jungle. When you come to Chiang Mai, it would be great to have an intimate encounter at the Nacai Elephant Camp. The Nacai Elephant Ecological Reserve raises a total of 7 baby elephants and 22 elephants, making it an extremely popular tourist destination. All the projects are here, and you will have a once-in-a-lifetime opportunity to have close contact with elephants and feed them. Swimming, playing, learning how to make medicine for elephants, and understanding their lifestyle habits.

Bua Thong Waterfall

Sticky Falls, also known as Bua Thong Falls, is a unique natural wonder located near Chiang Mai, Thailand. What makes this waterfall special is that the surrounding rocks are unusually grippy or sticky, hence the name.

Unlike regular waterfalls, where the rocks can be slippery due to algae or moss, the rocks at Sticky Falls have a porous structure that creates friction, allowing visitors to climb up and down with ease. It's almost like climbing up a giant natural staircase made of limestone.

The reason the rock is "sticky" is because calcium carbonate and minerals have been deposited over time. These minerals create a surface that feels rough to the touch, similar to sandpaper, and provides excellent traction even when wet.

Visitors can enjoy a unique rock climbing experience at Sticky Falls, where they can climb up the cascading tiers of the waterfall and swim in the natural pools formed by the flowing water.

New punching mecca: Bua Thong Waterfall

This is a secret base where natives in Chiang Mai like to play in the water.

Deep into the forest world of negative oxygen ion explosion, you will unlock the joy of climbing on the waterfall!
